(The specific components of this product constitute a trade secret. Listed are components reported in tests with laboratory animals to have hazardous properties other than combustibility or flammability or eye and skin irritation from excessive contact. Both of these hazards are addressed elsewhere on this data sheet. The relevancy of animal test data on these components to the mixture as a whole or to humans has not been established. Note that these possible effects in test animals were reported for continual overexposure to components of this mixture. Many of the substances having such effects are natural components of common foods and are not known to be harmful in normal use).

HEALTH HAZARD DATA:

Acetophenone: Continual Overexposure: irritant vapor, possible narcotic effects
Ethyl Methyl Phenyl Glycidate: If swallowed: possible nerve damage, possible testicular atrophy
Amyl Acetate: Continual Overexposure: irritant vapor, possible narcotic or anesthetic effects
Benzaldehyde: If Swallowed: possible kidney damage; Continual Overexposure: irritant vapor, possible anesthetic effects
Benzyl Acetate: Continual Overexposure: irritant vapor possible anesthetic effects
Coumarin: If Swallowed: toxic, possible liver damage, possible reproductive effects
Ethyl Acetate: Continual Overexposure: irritant vapor
Petroleum Distillates: Continual Overexposure: irritant vapor

SECTION 3: HAZARDS IDENTIFICATION

ROUTES OF ENTRY: Eye, skin contact, inhalation

SIGNS/SYMPTOMS OF OVEREXPOSURE:
